

What is claimed is:

1. A rack guide for a dishwasher rack having opposite sides, a front and a back, and being movably supported on tracks mounted on opposite vertical sidewalls in a dishwasher, the rack guide comprising:
 - 5 a member associated with the rack and extending laterally outwardly for engagement with the dishwasher vertical sidewall.
 2. The rack guide of claim 1 wherein the member snap fits onto the rack.
 - 10 3. The rack guide of claim 1 further comprising a leg extending from the member and adapted to engage the rack and prevent movement of the member.
 4. The rack guide of claim 1 further comprising a pair of legs extending from the member and adapted to engage the rack to stabilize the member.
 - 15 5. The rack guide of claim 1 wherein the member is integral with the rack.
 6. The rack guide of claim 1 wherein the member includes a wheel for engaging the vertical sidewall of the dishwasher.
 - 20 7. The rack guide of claim 6 wherein the wheel rotates about a vertical axis.
 8. An improved dishwasher rack comprising:
 - a wire rack with a front, a back, and opposite sides; and
 - 25 a pair of members on the rack, each being adapted for engagement with a vertical sidewall of the dishwasher to substantially preclude lateral movement of the rack.
 9. The dishwasher rack of claim 8 wherein each member snap fits onto the rack.
 - 30 10. The dishwasher rack of claim 8 wherein each member has at least one leg extending therefrom to engage the rack and thereby substantially preclude movement of the member.

11. The dishwasher rack of claim 8 wherein the members are integrally formed in the opposite sides of the rack.

5 12. The dishwasher rack of claim 8 wherein each member includes a wheel to roll along the vertical sidewall of the dishwasher.

13. The dishwasher rack of claim 12 wherein each wheel rotates on a vertical axis.

10 14. The dishwasher rack of claim 8 wherein each member is mounted adjacent a rear corner of the rack.

15. The dishwasher rack of claim 8 wherein the rack includes upright wires upon which each member is mounted.

15

16. The dishwasher rack of claim 8 wherein each member includes a curved surface for engaging the dishwasher sidewall.

17. The dishwasher rack of claim 16 wherein the curved surface of each member
20 extends about a vertical axis.
